HOTEL

Holiday Village Montenegro has a beach at its doorstep that spreads for 12 km along the coast and it is 50 meters wide. This region is known for its long sandy beaches, and Holiday Village Montenegro is located on the longest of them all- Velika Plaza, or The Big Beach. The highest measured temperature of air in the summer season reaches 38°C while the average is 24°C. During the summer months, the sun is out up to 11.5 hrs. a day.

Ulcinj Old Town is only 5km away and its cobblestone streets are home to traditional shops, some of which have real eastern flavor, with Turkish coffee pots, silver trays and copper water jugs. Inside the walls there is a fort, whitewashed mosques and a museum full of Roman and Ottoman artefacts.

The hotel opened in June 2018 with the first family swim up rooms in Montenegro, multiple A La Carte restaurants, tennis courts, indoor kids' playroom, high ropes adventure park, nearby Aqua Park, and more.
